

Neuroanatomy: information flow along the optic nerve

Bandwidth of the optic nerve

- Estimated to be 8960kbps (<https://www.newscientist.com/article/dn9633-calculating-the-speed-of-sight/>)
- ~1.1 megabytes per second
- An uncompressed 640*480 8-bit RGB image is $640 \times 480 \times 3$ bytes = 0.92 megabytes
